STORE DESIGN: Designed in collaboration with James Carpenter Design Associates, the flagship store creates an experience that is responsive and reflective of customers. The iconic seven-level flagship store forms in the base of the “tallest residential building in the Western Hemisphere,” the store is one of the first new stores to open in Manhattan since the 1920s. The store features a stunning waveform glass façade, providing an interactive viewing experience for customers inside the store and for all from the street level. The façade will bring in natural light, connecting the shopping experience to the city. Chain-mail veils and lighting effects will allow the store to reflect the seasons and create changing moods to celebrate special events. Without boxed-in windows, the entire store is a display window to the street. Soaring 19-foot ceilings and an open, flexible floor plan allows for evolution of how we curate and display products over time as our customers change and evolve. The store environment creates a sense of discovery, allowing customers to navigate easily and find new brands they haven’t experienced before.

ARTWORK: Emerging artists were commissioned to create 54 original pieces to enhance the shopping experience and the Art@Nordstrom app will provide customers with an audio-guided tour of the store’s collection.
